FOREWORD

The Sixth Symposium on Information and Communication Technology (SoICT 2015) was held on December 3-4, 2015, in Hue, Vietnam. SoICT 2015 is an international academic forum for researchers and graduate students to share their latest research findings and to identify future challenges in computer science. In 2015, the symposium was organized by ACM Vietnam Chapter, the School of Information and Communication Technology – Hanoi University of Science and Technology, Hue University's College Education and Duy Tan University.

SoICT 2015 has received 106 research papers from 18 different countries from four major areas of research including AI and Big Data, Networks and Security, Human-Computer Interaction, Software Engineering and Applied Computing. The Program Committee has followed a formal standard reviewing process: bidding, reviewing, and deliberating for selecting 49 papers for publication in the proceedings. It was our great honour to receive world-class invited speakers Yew-Soon Ong (Nanyang Technological University, Singapore), Michihiro Koibuchi (National Institute of Informatics, Japan) and Tom Schrijvers (KU Leuven, Belgium).

The organization of SoICT 2015 would not be possible without the great contribution and support from many people. We would like to thank the Program Committee members for their great responsibility in reviewing papers. We would like to thank all track chairs for actively monitoring the review and deliberation process and for proposing (sometimes difficult) decisions on papers. In particular, we would like to thank all Organizing Committee members, who have worked hard to ensure the best quality of the symposium.

Finally, we would like to thank all authors and participants for making SoICT 2015 a memorable and enjoyable academic event in Hue, Vietnam.
